

## Product Line

We use only the highest quality materials when covering your rollers with urethane or rubber. Custom blending for demanding applications is available, ask your representative if you need something special. The following are only a few of the many available compounds.

- Polyester & Polyether Urethanes
- Carboxylated Nitrile
- Nitrile/PVC
- Neoprene
- Fluoroelastomer
- Silicone
- Nitrile (NBR, BUNA N)
- Hydrogenated Nitrile
- EPDM
- Hypalon
- SBR
- Natural

## Types:

- Coating Rollers
- Feed Rollers
- Conveyor Rollers
- Pinch Rollers
- Tension Rollers
- Guide Rollers
- Urethane Blades
- Urethane Tubes
- Rubber covered fiberglass sleeves for gravure & flexo printing
- Applicator Rollers
- Over Varnish Rollers
- Glue Rollers
- Compression Rollers
- Bridle Rollers
- Meter Rollers
- Urethane Rods
- Urethane Sheets
- Urethane Rings
- Tapered Fiberglass Print Sleeves

## Capabilities/Finishes

### Capabilities:

- Diameter Range .500" to 28"
- Length Range .500" to 160" OAL
- Durometer Range Shore A 25-95
- Color Choices: Red, Black, Blue, Green, Natural
- Roll Weight Maximum 4,000 lbs.
- Fine Tool
- Rough Grind
- Smooth Grind
- Polished
- Crepe Finish
- CNC Crowning and Grooving
- High & Low Specific Surface
- Finishes (Ra & Rz)

# URETHANE ROLLER SPECIALIST, INC

QUALITY SERVICE SINCE 1969

## Company History

In 2013, URS expanded its facilities to include in-house repair and fabrication, a complete line of rubber compounds and state of the art equipment, including CNC roll grinders and groovers.

### URS is dedicated to:

- Quality
- Superior Products
- Customer Service

Urethane Roller Specialist, Inc. was founded in 1969. The mission was simple: supply the highest quality product backed by superior customer service. The first market URS serviced was the metal decorating industry, which included can manufacturers, sheet coaters and continuous coil coaters. URS went on to pioneer the development of the roller skate wheel, manufacturing over 20,000,000 in one year for worldwide distribution. URS was also one of the first companies to manufacture urethane bowling balls. We have expanded beyond the metal decoration industry to breweries, conveyor equipment manufacturers, wood working industries, mining, steel mills, auto makers, envelope and box board manufacturers. After 40 years, we are still a leading supplier of industrial rollers.

## Services/Focus

Our services offer cost savings to each customer by eliminating the need for costly OEM parts. By re-covering your worn rollers with urethane or rubber, we can extend the life of your parts.

### Hard Durometer and Molded Parts:

- Manufacturing division dedicated to producing hard durometer parts
- Durometers up to 95 Shore A
- Four different finishes and four color choices

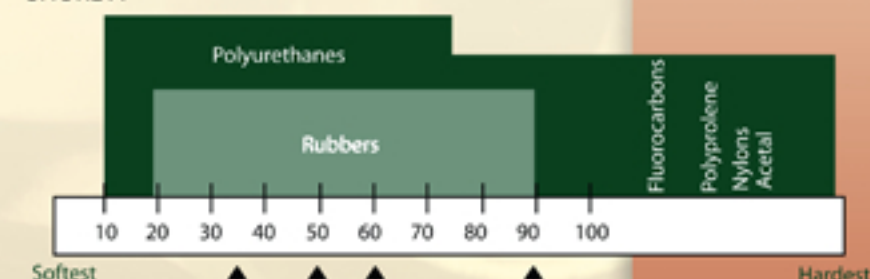

### Metal Decorating:

- Leading supplier of coating rollers for the metal decorating industry
- Custom formulations
- Durometer ranges from 25 to 60 Shore A
- Journal and bearing surface repairs
